Address: 24/1 Rajasinghagama, Werellagama, Hedeniya

PROFESSIONAL SUMMARY

Full-stack developer with an HND in Information Technology (GPA 3.67 / 4.0) who builds and deploys complete web applications with React.js, Next.js, Node.js, Spring Boot and MongoDB / MySQL. Have integrated the Google Gemini API into multiple projects to deliver AI-powered features. Seeking a Full-Stack Developer Intern role to grow my skills and contribute to real-world software.

PROJECTS

Shopease – AI-Powered E-Commerce Platform | HNDIT Final Project

Tech: React.js, Node.js, MongoDB, Supabase, Tailwind CSS, Google Gemini API

- **Situation:** Online shoppers often struggle to find suitable products and need quick support while browsing.
- **Task:** Design and build a complete e-commerce platform with AI-driven assistance as my HNDIT final project.
- **Action:** Developed the full-stack application (MERN stack) with responsive interfaces and core e-commerce functionality, and integrated the Google Gemini API for product recommendations and an automated customer assistant.
- **Result:** Delivered and deployed a working AI-powered store that gives shoppers personalised recommendations and instant support.

SmartLedger-LK – AI Accounting Platform

Tech: Next.js, Node.js, MongoDB, Google Gemini API, Vercel

- **Situation:** Manual bookkeeping is time-consuming and gives little insight into financial performance.
- **Task:** Build a web-based accounting platform that records finances and provides AI-assisted guidance.
- **Action:** Implemented transaction tracking and financial record management with Next.js, Node.js and MongoDB; integrated the Google Gemini API for AI-assisted accounting support and financial insights; deployed on Vercel.
- **Result:** Delivered a live platform where users manage transactions and receive AI-generated financial insights in one place.

Hardware Inventory Management System | Team Project

Tech: Java, MySQL

- **Situation:** Tracking hardware stock and supplier details manually is slow and error-prone.
- **Task:** Develop a database-driven system to manage stock, suppliers and inventory records.
- **Action:** Designed the database and built the application using Java and MySQL, working with team members through design, development and testing.
- **Result:** Delivered a working system that keeps stock, supplier and inventory records in one place, completed through effective team collaboration.

EDUCATION

Higher National Diploma in Information Technology (HNDIT)

2024 – 2026

Sri Lanka Advanced Technological Institute (SLIATE), Kandy

GPA: 3.67 / 4.0

TECHNICAL SKILLS

Languages: Java, JavaScript (ES6+), Python, C#

Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS, Bootstrap, Responsive Web Design, UI/UX Principles

Backend: Node.js, Express.js, Spring Boot, RESTful API Design & Development

Databases: MongoDB, MySQL, PostgreSQL, Database Design & Modeling

AI Integration: Google Gemini API

Tools & DevOps: Git, GitHub, Postman, VS Code, IntelliJ IDEA, Eclipse, Maven, npm, Vercel

Concepts: OOP, Data Structures & Algorithms, MVC Architecture, MERN Stack, API Integration, Agile / SDLC

SOFT SKILLS & LANGUAGES

Soft Skills: Teamwork, Leadership, Effective Communication, Time Management, Critical Thinking, Problem Solving

Languages: English (Fluent), Sinhala (Fluent)
